WHO Operativer Rahmen für klimaresiliente und kohlenstoffarme Gesundheitssysteme

Die EU Strategie über die Anpassung an den Klimawandel (2021)

Nationale Anpassungsstrategien und -pläne

Der europäische 'Green Deal'

Das europäische Klimagesetz (2021)

What is included in the European Climate Law?

- > An EU-wide legal target for climate neutrality by 2050 that binds the **EU Institutions and national governments**. 
- > Creating a predictable business environment for **industry and investors**, with the pace of emission reductions mapped out from 2030 to 2050, showing them what needs to be done, and at what speed. 
- > A process to include in the Climate Law **the updated 2030 emissions reduction target**. 
- > A mechanism for **keeping everybody on track** – with regular reporting on progress and tools to catch up if anyone falls behind. 
- > A focus on the effective transition towards a fair and prosperous society, with a **modern, resource efficient and competitive economy**. 
- > A renewed focus on adapting to the impacts of climate change to strengthen Europe's resilience, including for its **vulnerable communities**. 

Das europäische Beobachtungszentrum für Klima und Gesundheit

Zielsetzungen:

- Überwachung von Gesundheitsrisiken, -auswirkungen und –maßnahmen
- Integration der Anpassung in nationale und subnationale Gesundheitspolitik/-systeme
- Verbesserte Fähigkeit zur Antizipation und Prävention
- Klimakompetente Gesundheitsfachleute, die in die Entscheidungsfindung einbezogen werden
- Weithin bekannte Lösungen und Interventionen

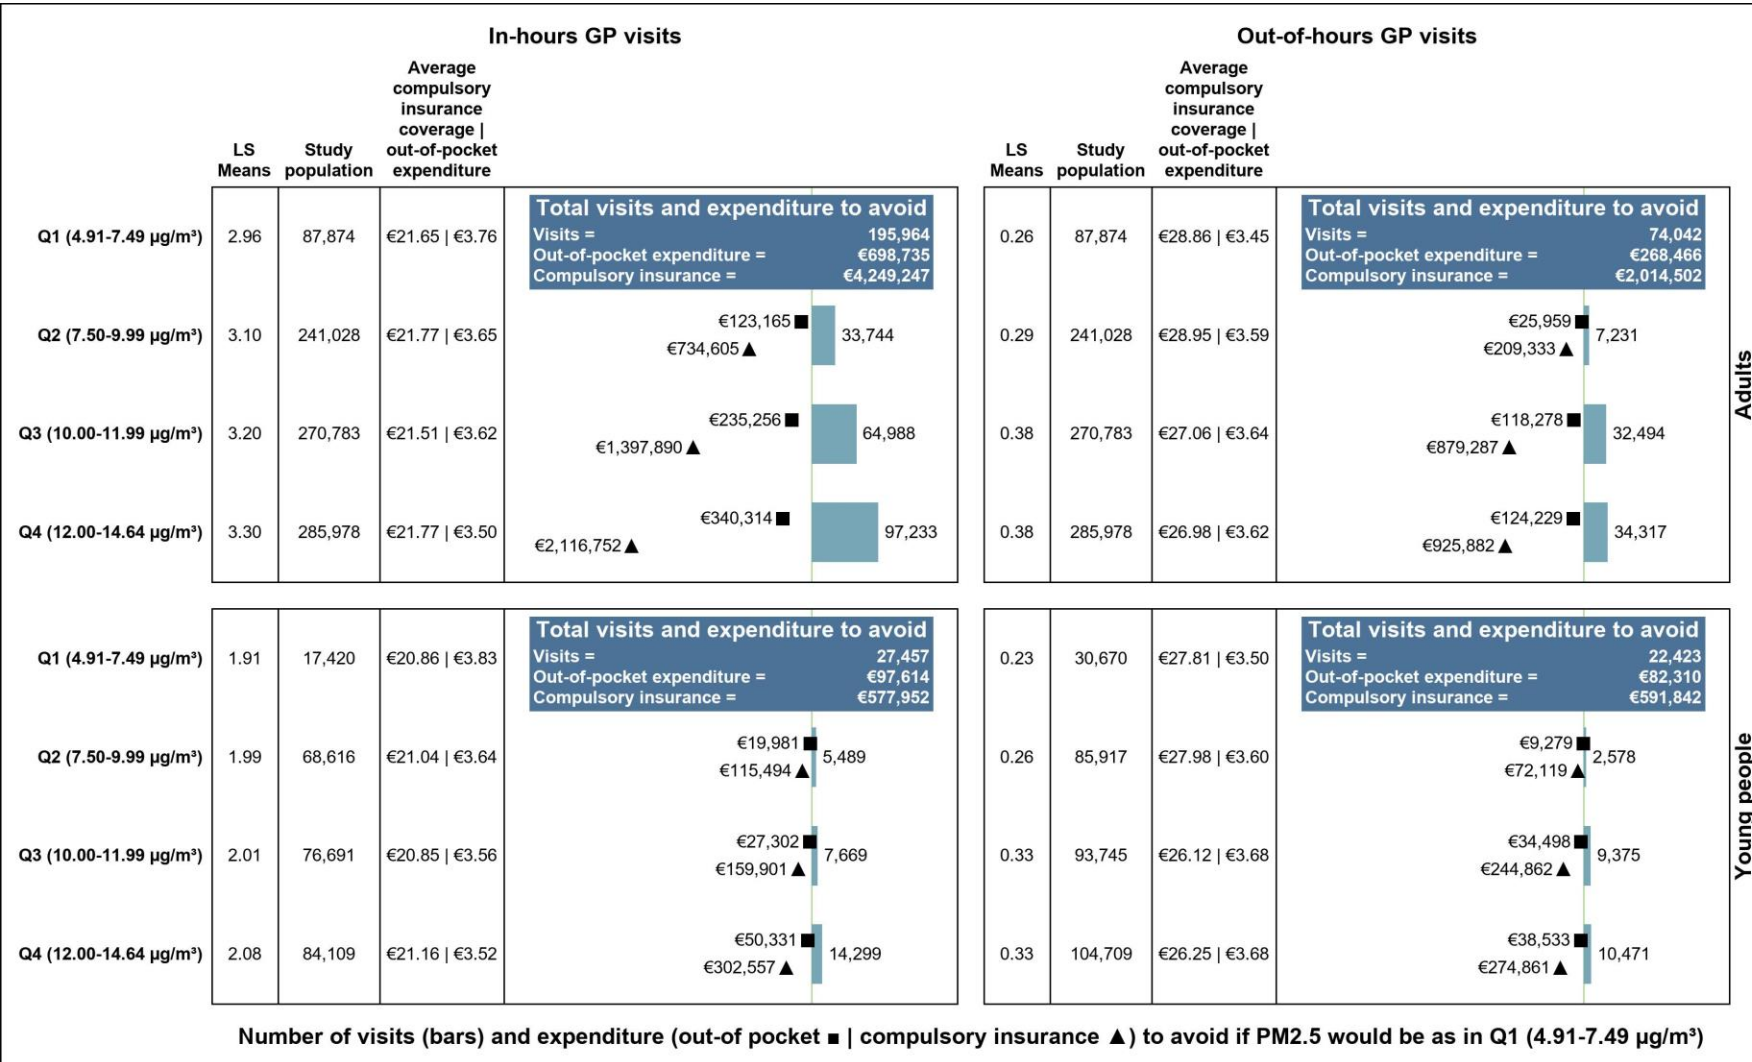

European Climate and Health Observatory

We provide easy access to a wide range of relevant publications, tools, websites and other resources related to climate change and human health.

- Verbesserung der Sachkenntnis
- Zusammenbringen von relevanten Interessensgruppen
- Voneinander lernen

Ergebnisse

Jährlich potenziell vermeidbare Kosten für Besuche beim Hausarzt... darunter rund 37 Millionen Euro, die von der Krankenversicherung getragen werden, und 6 Millionen Euro, die aus eigener Tasche gezahlt werden.

AIM Healthcare and social benefits for all

Climate-resilient Healthcare Systems ...

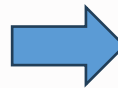

1. Guarantee the ambitious implementation of the **EU Strategy on Adaptation to Climate Change**, notably by closing the financing gap for climate resilient investments in Europe through the mobilisation the EU Budget and Funds.
2. Ensure that all Member States adopt **National Adaptation Strategies and Plans** which more systematically include **measures aiming the healthcare sector**. 
3. Strengthen **prevention and community-based primary care** for a better preparedness for future shocks and prevention of climate-sensitive health risks .
4. Strive for **climate-neutral healthcare facilities by 2050** and reduce the emissions of the sector caused by **transport**.
5. Ensure the collection of harmonised and comprehensive data on climate and health across the EU through the development of **EU climate-health indicators** and the creation of a **network of National Climate-Health Knowledge Centres**. 
6. Implement sustainable **healthcare waste management** practices, including "waste reduction, segregation, safe recycling, and the phase out of incineration in favour of steam-based disinfection".
7. Adapt the **skills of healthcare professionals** to changing healthcare needs related to emerging climate-related risks and ensure their sufficiency in the face of a growing and changing demand. 
8. Improve **prescribing** practices and prevent **pharmaceutical pollution**.
9. Improve public health **risk communication**.
10. Tackle the **drivers of climate-change outside the health system**.

... and Social Security

11. Prevent the exacerbation of inequities by guaranteeing the **fair transition** to climate-resilient societies. 
12. Develop new cross-sectoral approaches and policies to reduce climate risk and vulnerability and achieve **equity, as a basis for better preparedness**.
13. Link **social protection and climate change** responses and integrate risk management.
